

#### SAFETY BAR WITH LOCKOUT SYSTEM

The Workhorse2000 has an advanced safety system. A safety bar with lockout system requires that the operator be seated with the bar in place, before the hydraulics can be engaged. Excellent operator visibility is another safety advantage.

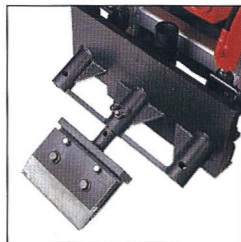

#### SINGLE LEVER JOY STICK CONTROL

The center-mounted, single lever joy stick means less operator fatigue because it can be controlled easily with the touch of a finger using the right or left hand. In addition, the zero turning radius makes the Workhorse2000 perfect for working in tight situations.

#### AUXILIARY HYDRAULICS

Auxiliary hydraulics with no-leak quick disconnect couplings make changing the multiple attachments of the Workhorse2000 fast and easy. The auxiliary output has a flow rate of 9 gallons per minute and maximum pressure of 2,000 psi.

#### MULTIPLE ATTACHMENTS

Besides its compact size, the optional attachments set the Workhorse2000 apart from the competition. A patent pending scraper blade holder, 2.84 cu. ft. bucket, 30" grinder/scrapper EDCO multi-accessory discs, scarifier, lift fork, bucket with grapple fork, dozer blade and hydraulic hammer, make this machine truly multi-functional.

The Workhorse2000 may look familiar, but look closer. It's smaller than traditional skid loaders and weighs only 2,800 pounds. In fact, it is so compact and maneuverable, it can fit in small elevators and through standard doorways.

And the Workhorse2000 is multifunctional. With optional attachments it strips, scrapes, cuts, grinds, loads and lifts. A new and improved blade design maintains better floor contact, making it ideal for removing floor coverings including carpet, tile, latex, mastic, felt paper, elastic membranes and paint. A rotating blade holder even eliminates sharpening.

Once the Workhorse2000 diesel engine starts working, it keeps on working. A large capacity fuel tank increases running time. No more propane headaches. In addition, toxic fumes and CO levels are 10 times lower than propane, resulting in cleaner air. Each Workhorse2000 includes an exhaust purifier performance certificate.

Other standard features include:

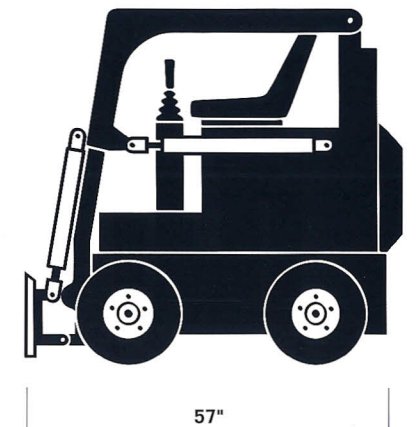

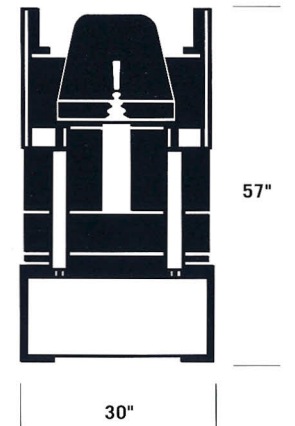

- Hydrostatic 4-wheel drive with zero turning radius
- Center-mounted, joy stick control
- Quick attachment system
- Exhaust purifier
- Non-marking drive tires
- Operating lights

Abatement, demolition, commercial renovation, carpet, floor tile, concrete, roofing and waterproofing contractors will find the Workhorse2000 an indispensable piece of equipment.

For those jobs where space is tight and power is needed in a variety of tasks, get help from the Workhorse2000.

#### SPECIFICATIONS

Weight	2,800 lbs
Lift capacity	500 lbs
Fuel capacity	10 gal.
Hydraulic capacity	15 gal.
Auxiliary output	9 GPM
Travel Speed	4.5 MPH
Engine	Yanmar 3TNE74
HP@rated RPM	23.7 @ 3600
Maximum RPM	3600 RPM
Displacement	61.39 cu. in. (1006cc)
Cooling medium	water cooled
No. of cylinders	3
Lift height to hinge pin	72 inches

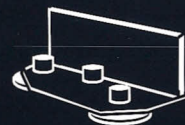

#### ATTACHMENTS

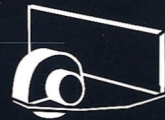

Scraper Blade

Bucket

Grinder/Scrapper

Scarifier

Lift Fork

Bucket with Grapple Fork

Hydraulic Hammer

Dozer Blade
